MANAGEMENT'S DISCUSSION AND ANALYSIS ("MD&A")
(For the Three and Six Months Ended June 30, 2018)

*The following MD&A is intended to assist the reader to assess material changes in financial condition and results of operations of Thor Explorations Ltd. ("Thor" or the "Company") as at and for the three and six months ended June 30, 2018 and 2017.*

*This MD&A should be read in conjunction with the unaudited condensed consolidated financial statements and notes thereto for the three and six months ended June 30, 2018, and the audited consolidated financial statements and notes thereto for the year ended December 31, 2017. These unaudited condensed consolidated financial statements have been prepared using accounting policies consistent with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB"), and in accordance with International Accounting Standard 34 – Interim Financial Reporting ("IAS 34").*

*All dollar amounts are expressed in Canadian dollars unless otherwise indicated. Note that additional information relating to the Company is available on SEDAR at [www.sedar.com](http://www.sedar.com).*

## DATE

This MD&A is prepared as of August 29, 2018.

## OVERVIEW

Thor Explorations Ltd. ("Thor" or the "Company") is a Canadian junior mineral development and exploration company and trades on the TSX Venture Exchange (the "Exchange") under the symbol "THX-V". Thor has no revenues and is engaged in the acquisition, exploration and development of mineral properties located in West Africa.

Thor has a prospective portfolio of development and exploration projects in Nigeria, Senegal and Burkina Faso.

The Company's main focus is on its 100% owned flagship project, the Segilola Gold Project located in Osun State, Nigeria approximately 120km northeast of Lagos. The Segilola Gold Project, which is considered to be the most advanced gold project in Nigeria, contains a probable reserve of 448,000 ounces of gold grading at 4.2 g/t, an indicated mineral resource estimate of 556,000 ounces of gold grading at 4.3 g/t. and an inferred mineral resource estimate of 306,000 ounces of gold grading at 4.7 g/t, with additional significant exploration upside potential and near-term production potential. Please refer to the NI 43-101 technical report titled "Segilola Preliminary Feasibility Study – October 2017", available on the Company's website in the 'Investors' section for further details.

Thor holds a 70% interest in the Douta Gold Project located in southeastern Senegal. The Douta Gold Project currently consists of an early stage gold exploration license located in southeastern Senegal, approximately 700 km east of the capital city Dakar. The permit lies within the Kéniéba Inlier which hosts significant gold deposits and has attracted major international mining companies. The permit covers an area of 103 $km^2$, and lies in proximity to recent discoveries of significant gold deposits. The Makosa Gold Discovery is a discovery located on one of a number of soil anomalies within a 13 km long zone of mineralisation parallel to the Main Transcurrent Shear Zone in the south of the permit. The Makosa Prospect was prioritised by Thor as an analogue to Randgold's Massawa project, located approximately 5km to the west. Thor has also completed a 1,000 metre scout drilling on the Maka Prospect which is located in the Maka Area, in the north-east of the Douta Permit. This target had been delineated by previous drill target generation that included soil geochemistry carried out by the Company.

Thor also holds a 49% interest in two contiguous Bongui and Legue gold permits covering an area of 233 $km^2$, and a 49% interest in the Ouere gold permit, covering an area of approximately 241 $km^2$ all in Burkina Faso. These three permits comprise the Central Houndé Project, located within the Houndé belt, 260 km southwest of the capital Ouagadougou, in western Burkina Faso. The Central Houndé Project is being advanced through a Farm-out Agreement with Acacia Mining Plc who can earn up to an 80% interest in the project. As at December 31, 2017, Acacia has met the minimum spending requirement for the Phase 1 Earn-in. As a result, Acacia earned a 51% interest in the Central Houndé Project.

On December 29, 2017 the Company announced that the Office of the Nigeria Mining Cadastre had granted Segilola Gold Ltd, a wholly owned subsidiary of Thor, four new gold exploration licences, located in southwest Nigeria. The licences, which total 334 square kilometres, are located between 30km and 80km north-east of the Segilola Gold Project and cover significant sections of the structural trends that extend northwards from the Segilola high grade gold deposit. The licence areas were identified through remote sensing and target generation based on aeromagnetic interpretation.

The Company requires continued funding for its exploration and development activities and although the Company has been successful in securing additional financing to date, the current market conditions raises material uncertainties that may cast significant doubt about the Company's ability to continue as a going concern.

## SIGNIFICANT EVENTS AND TRANSACTIONS

### Segilola Project, Nigeria

Thor commenced its Definitive Feasibility Study ("DFS") work in January 2018. A 4,000 metre Core Drilling program commenced in February and completed in April, initially focussed on metallurgical, open pit infill resource drilling and geotechnical drilling.

On April 25, the Company announced initial results from the drilling program with highlights including:

- SGD171: **5.9 metres at 16.3g/tAu** including **4.4 metres at 23.4g/tAu**
- SGD173: **5.5 metres at 30.1g/tAu** including **1 metre at 117.6 g/tAu**
- SGD174: **10.8 metres at 9.7g/tAu** including **0.5 metres at 151.2 g/tAu**
- SGD178: **25 metres at 3.4g/tAu**

Following the completion of the Metallurgical drilling, a representative bulk sample totalling over 500kg of diamond core was sent to Independent Metallurgical Operations ("IMO") Perth. The targeted outcome of the metallurgical test work program was to optimise the Preliminary Feasibility Study ("PFS") process flowsheet, with the expected inclusion of a gravity recovery circuit and investigation of other identified opportunities for process design enhancements.

Highlights from the metallurgical test work:

- 77.5% average gravity recovery confirmed in metallurgical test work program
- 98.9% total recovery confirmed at 106 µm grind size and 24hr cyanide leach
- Average recovered head grade of 8.73g/tAu compared to estimated grade of 6.66 g/t Au

On May 30 the Company announced further drilling results with highlights including:

- SGD187: **6.3 metres at 15.3g/tAu**
- SGD188: **7.6 metres at 9.8g/tAu**
- SGD189: **8.0 metres at 6.3g/tAu**
- SGD178: **4.3 metres at 10.5g/tAu**

The Company also announced on May 30 the completion of a detailed fixed-wing LIDAR and photo-imagery survey of the exploration license (incorporating the Segilola mining license) that will provide a detailed topographical base for site planning and DFS engineering design, as well as providing further social and environmental information and additional data for exploration activities.

**<u>Douta Project, Senegal</u>**

On March 12, 2018 the Company announced the commencement of an 8,000 metre RC drilling program (the "2018 RC Program") on the Douta Project. Drilling completed in June. This program followed on from its successful 2017 RC Program which identified a number of wide, near-surface significant intersects on the Makosa Prospect in the Douta Project, notably 10 metres at 8.1g/tAu including 7metres at 10.9g/tAu.

Based on the current data, the mineralization appears to be open along strike and down dip and at depth. The 2018 RC Program has been designed to target the mineralization zone delineated by the 2017 RC Drilling Program at both down dip and along strike.

On June 14 the Company announced initial results with highlights including:

- Near-surface gold mineralisation
- Continuous mineralisation down dip and over a 3km strike
- Open-ended on strike and at depth
- Significant intersections:
  - 9 metres at 1.84 g/tAu
  - 3 metres at 13.2 g/tAu
  - 7 metres at 2.3 g/tAu
  - 4 metres at 3.0g/tAu
  - 10 metres at 1.86g/tAu

On August 28th 2018, the Company it had drilled a potential discovery hole at a new prospect called Maka South located in the north east of the Douta Permit on its Douta Gold Project in south-east Senegal. Drillhole DMRC012 on the Maka South Target intersected 4 metres true width at 11.4g/tAu from 18m downhole. In addition to this result, seven other RC holes intersected anomalous gold mineralisation including 1m at 3.59g/t Au.

**Burkina Faso**

During the quarter, Acacia Mining Plc ("Acacia") continued its exploration work as per its JV with Thor. Detailed field geological mapping and rock-chip sampling continued on the Légué-Bongui Corridor and on the Ouéré gold soil anomaly. An IP geophysical survey, comprising 40 line kilometres, was conducted on the Legué South-West target. The programme for the year on the Central Houndé project comprises 11,500 metres of air-core drilling to test the continuity of the gold mineralisation along strike and to test soil anomalies. During the first half of the year to June 30, a total of 2,037 meters were drilled with preliminary results indicating the existence of additional high grade oxide zones which are likely to add to the mineralisation inventory. In addition, SRK Consultancy (UK) Limited were contracted to update the mineral resource estimation, based on a new 3D geology model. Preliminary results of the new mineral resource estimation appear to demonstrate an increase in the geological inventory at the project.

Qualified Person's Statement

Scientific or technical information in this MD&A that relates to the Company's exploration activities in Nigeria, Senegal and Burkina Faso has been prepared under the supervision of Alfred Gillman (Fellow AusIMM, CP), who is designated as a "qualified person" under National Instrument 43-101 and has reviewed and approved the content of this MD&A. Mr Gillman consents to the inclusion in this MD&A of the information, in the form and context in which it appears.

## OVERALL PERFORMANCE

For the six months ended June 30, 2018, the Company incurred a net loss of $3,003,383 ($0.01 loss per share) compared to a net loss of $1,735,566 ($0.00 loss per share) for the six months ended June 30, 2017. The increase in net loss is mainly due to stock-based compensation expenses arising from the issue of options to directors, officers and group consultants, foreign exchange losses and an increase in investor relations and travel costs.

For the three and six months ended June 30, 2018, the Company incurred a total of $1,863,876 and $3,050,990 of deferred exploration expenditures (three and six months ended June 30, 2017 - $1,118,335 & $1,520,103). The increase in deferred exploration expenditures is mainly due to works undertaken on the Segilola Gold Project in Nigeria of $1,889,983 and the Douta Gold Project in Senegal of $1,153,222. The cumulative exploration expenditures incurred to June 30, 2018 amounts to approximately $11,450,724.

During the quarter, there were no project acquisition payments related to the Company's licenses. The cumulative Segilola Gold Project, Nigerian exploration licenses, Douta Gold Project and Central Houndé Project expenditures at June 30, 2018 amount to $19,747,473, $13,547, $6,199,492 and $664,145 respectively.

As at June 30, 2018, the Company had cash of $503,494 and a net working capital deficit of ($3,084,127) including a deferred payable of $2,574,675 for the purchase of the Segilola Gold Project which falls due in August 2018 (December 31, 2017 - cash of $239,605 and a working capital deficit of $2,633,719). The Company must secure additional financing in the short term to progress on-going operations.

## SUMMARY OF QUARTERLY RESULTS

The table below sets forth selected results of operations for the Company's eight most recently completed quarters (in Canadian dollars, except per share amounts).

| Description | Q2 June 30 2018 $ | Q1 Mar 31 2018 $ | Q4 Dec 31 2017 $ | Q3 Sep 30 2017 $ | Q2 Jun 30 2017 $ | Q1 Mar 31 2017 $ | Q4 Dec 31 2016 $ | Q3 Sep 30 2016 $ |
|---|---|---|---|---|---|---|---|---|
| *Revenues* | - | - | - | - | - | - | - | - |
| *Net loss for period* | (541,881) | (2,461,502) | (609,532) | (300,912) | (285,600) | (1,449,966) | (391,167) | (192,142) |
| *Basic and fully diluted loss per share* | 0.00 | 0.01 | 0.00 | 0.00 | 0.00 | 0.01 | 0.00 | 0.00 |

| Other loss (gain) | **-** | (179) | **-** | (179) |
| Share-based payments | **-** | - | **1,960,307** | 970,000 |
| **Loss from operations before income tax** | **(541,881)** | (285,600) | **(3,003,383)** | (1,735,566) |

**Results of operations for the six months ended June 30, 2018 and 2017**

Loss for the period

The Company reported a net loss of $3,003,383 ($0.01 loss per share) for the six months ended June 30, 2018 as compared to a net loss of $1,735,566 ($0.00 loss per share) for the six months ended June 30, 2017. The increase in loss was the result of an increase over the comparable six months to June 30, 2017 period in share based payments of $990,307, an increase in investor relations & transfer agents fees of $57,670, an increase in travel costs of $43,191, as well as an increase in foreign exchange losses of $105,627.

Revenue

The Company does not have any operating revenue. The Company's sole source of income is interest income on cash balances. No interest was earned during the six months ended June 30, 2018 and 2017.

**Results of operations for the three months ended June 30, 2018 and 2017**

Loss for the period

The Company reported a net loss of $541,881 ($0.00 loss per share) for the three months ended June 30, 2018 as compared to a net loss of $285,600 ($0.00 loss per share) for the three months ended June 30, 2017. The increase in net loss is mainly due an increase in consultancy costs of $98,134, investor relations & transfer agents fees of $42,243, an increase in foreign exchange losses of $54,746, and travel expenses of $46,980 which all result from the increase in the Company's operational activities.

Revenue

The Company does not have any operating revenue. The Company's sole source of income is interest income on cash balances. No interest was earned during the three months ended June 30, 2018 and 2017.

## SELECTED ANNUAL INFORMATION

| FOR THE YEAR ENDED | DECEMBER 2017 $ | DECEMBER 2016 $ | DECEMBER 2015 $ | DECEMBER 2014 $ |
|---|---|---|---|---|
| *Total revenues* | Nil | Nil | Nil | Nil |
| *Net loss* | (2,646,010) | (847,310) | (461,208) | (476,936) |
| *Loss per share – basic and diluted* | 0.01 | 0.00 | 0.00 | 0.00 |
| *Total assets* | 36,051,988 | 34,283,236 | 14,262,512 | 13,063,025 |

| *Cash dividends declared* | Nil | Nil | Nil | Nil |

## LIQUIDITY AND CAPITAL RESOURCES

The Company had cash of $503,494 and a net working capital deficit of ($3,084,127) as at June 30, 2018, including a deferred payable of $2,574,675 for the purchase of the Segilola Gold Project which falls due in August 2018 (December 31, 2017: cash of $239,605 and a working capital deficit of $2,633,719). The increase in cash balance of $263,889 is as a result of a private share placement completed in March 2018 totalling $3,607,000 net of costs offset by expenditure on operational overheads of $735,343 and exploration expenditures primarily on the Company's Segilola Gold Project in Nigeria and Douta Gold Project in Senegal totaling $2,424,703.

The Company has no source of income and is dependent on securing additional financing to fund current activities and corporate overhead. Although the Company has been successful in securing additional financing in the past, there can be no certainty that future fundraisings will be successful which raises material uncertainties that may cast significant doubt about the Company's ability to continue as a going concern.

As the Company is in the exploration stage, the recoverability of the costs incurred to date on exploration properties is dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain the necessary financing to complete the exploration and development of its properties and upon future profitable production or proceeds from the disposition of the properties and deferred exploration expenditures. As at June 30, 2018 the Company had no long term debt. As at the reporting date the Company was undertaking DFS studies on its Segilola Gold Project in Nigeria. Please refer to Subsequent Events section for the details of a post period end fundraising.

Private Placement

On December 29, 2017 the Company announced a proposed non-brokered private placement to issue up to 25,000,000 common shares ("Common Shares") at a price of $0.17 per Common Share for gross proceeds of $4,250,000.

The placement closed on March 29, 2018 with 24,910,659 Common Shares being issued raising gross proceeds of $4,234,812. The Company paid $222,027 as finder's fees to third party finders.

## RELATED PARTY DISCLOSURES

A number of key management personnel, or their related parties, hold or held positions in other entities that result in them having control or significant influence over the financial or operating policies of the entities outlined below. A number of these entities transacted with the Company during the current or comparative reporting periods.

### a) Trading transactions

The Company's related parties consist of companies owned by executive officers and directors as follows:

| | **Nature of relationship** |
|---|---|
| Alcester Projects Limited | Management |
| Mansion Minerals Ltd. | Management |
| Goldstream Capital Corporation | Directors Fees |

### b) Compensation of key management personnel

There are no other related party disclosures other than those disclosed in the Company's unaudited condensed consolidated interim financial statements and notes thereto for the three and six months ended June 30, 2018.

## OFF–BALANCE SHEET ARRANGEMENTS

Except as otherwise noted, the Company is not committed to any material off-balance sheet arrangements.

## PROPOSED TRANSACTIONS

Except as otherwise noted, the Company does not have any other material proposed transactions.

## CRITICAL ACCOUNTING ESTIMATES

The Company is a venture issuer; therefore, this section is not applicable.

## CHANGES IN ACCOUNTING POLICIES INCLUDING INITIAL ADOPTION

**a) Application of new and revised International Financial Reporting Standards**

There were no new standards or interpretations effective for the first time for periods beginning on or after 1 January 2018 that had a significant effect on the Group's financial statements.

**b) Future accounting pronouncements**

*(i) There are a number of standards and interpretations which have been issued by the International Accounting Standards Board that are effective in future accounting periods that the Group has decided not to adopt early. The most significant of these is:*

***New standard IFRS16 Leases***
Mandatorily effective for periods beginning on or after January 1, 2019

The Group does not have any assets or liabilities arising from a lease as at June 30, 2018. It is not considered that the impact of IFRS16 will be material.

*(ii) There are no other standards issued by IASB, but not yet effective, that are expected to have a material impact of the group.*

## FINANCIAL INSTRUMENTS AND OTHER INSTRUMENTS

The Company's financial instruments consist of cash, amounts receivable, investment, and accounts payable and accrued liabilities.

**Fair value of financial assets and liabilities**
Fair values have been determined for measurement and/or disclosure purposes based on the following methods. When applicable, further information about the assumptions made in determining fair values is disclosed in the notes specific to that asset or liability.

The carrying amount for cash, amounts receivable, and accounts payable and accrued liabilities on the statement of financial position approximate their fair value because of the limited term of these instruments. Investment is carried at cost as it is not traded on an active market.

**Fair value hierarchy**
Financial instruments that are measured subsequent to initial recognition at fair value are grouped in Levels 1 to 3 based on the degree to which the fair value is observable:

- Level 1 fair value measurements are those derived from quoted prices (unadjusted) in active markets for identical assets or liabilities; and
- Level 2 fair value measurements are those derived from inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- Level 3 fair value measurements are those derived from valuation techniques that include inputs for the asset or liability that are not based on observable marker data (unobservable inputs).

The Company did not have any financial instruments in Level 1, 2 and 3.

**Financial risk management objectives and policies**
The Company has exposure to the following risks from its use of financial instruments

- Credit risk
- Liquidity and funding risk
- Market risk

In common with all other businesses, the Company is exposed to risks that arise from its use of financial instruments. This note describes the Company's objectives, policies and processes for managing those risks and the methods used to measure them. Further quantitative information in respect of these risks is presented throughout these consolidated financial statements.

There have been no substantive changes in the Company's exposure to financial instrument risks, its objectives, policies and processes for managing those risks or the methods used to measure them from previous years unless otherwise stated in these notes.

The Board of Directors has overall responsibility for the establishment and oversight of the Company's risk management framework. The overall objective of the Board is to set policies that seek to reduce risk as far as possible without unduly affecting the Company's competitiveness and flexibility. Further details regarding these policies are set out below.

***Credit risk***
Credit risk is the risk of an unexpected loss if a counterparty to a financial instrument fails to meet its contractual obligations. The credit risk associated with cash and receivables is believed to be minimal.

Cash consists of cash on deposit in Canadian, UK, Nigerian and Senegalese Chartered banks that are believed to be creditworthy.

Amounts receivable is comprised primarily of amounts due from the Government of Canada related to General Sales Tax. The Company does not believe it is exposed to significant credit risk and counterparty risks.

***Liquidity and funding risk***
Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company ensures that there is sufficient capital in order to meet short-term business requirements, after taking into account the Company's holdings of cash. The Company's cash is held in business accounts and are available on demand. Funding risk is the risk that the Company may not be able to raise equity financing in a timely manner and on terms acceptable to management. There are no assurances that such financing will be available when, and if, the Company requires additional equity financing.

In the normal course of business, the Company enters into contracts and performs business activities that give rise to commitments for future minimum payments.

The following table summarizes the Company's significant remaining contractual maturities for financial liabilities at June 30, 2018 and December 31, 2017.

**Contractual maturity analysis as at June 30, 2018**

| | Less than 3 months $ | 3 – 12 Months $ | 1 – 5 Year $ | Longer than 5 years $ | Total $ |
|---|---|---|---|---|---|
| Accounts payable | 488,313 | 180,000 | - | - | 668,313 |
| Accrued liabilities | 428,273 | - | - | - | 428,273 |
| Other non-current liabilities | 2,633,600 | - | - | - | 2,633,600 |
| | **3,550,186** | **180,000** | **-** | **-** | **3,730,186** |

**Contractual maturity analysis as at December 31, 2017**

| | Less than 3 months $ | 3 – 12 Months $ | 1 – 5 Year $ | Longer than 5 years $ | Total $ |
|---|---|---|---|---|---|
| Accounts payable | 200,848 | 180,000 | - | - | 380,848 |
| Accrued liabilities | 304,436 | - | - | - | 304,436 |
| Other non-current liabilities | - | 2,509,000 | - | - | 2,509,000 |
| | **505,284** | **2,689,000** | **-** | **-** | **3,194,284** |

***Market risk***

The Company is subject to normal market risks including fluctuations in foreign exchange rates and interest rates. Interest rate risk is the risk arising from the effect of changes in prevailing interest rates on the Company's financial instruments. While the Company manages its operations in order to minimize exposure to these risks, the Company has not entered into any derivatives or contracts to hedge or otherwise mitigate this exposure.

**a) Interest rate risk**

The Company has minimal exposure to interest rate fluctuations on its cash balances due to current low market interest rates.

**b) Foreign currency risk**

The Group seeks to manage its exposure to this risk by ensuring that where possible, the majority of expenditure and cash of individual subsidiaries within the Group are denominated in the same currency as the functional currency of that subsidiary.

The Company's exploration expenditures, certain acquisition costs and other operating expenses are denominated in United States Dollars, UK Pounds Sterling and Australian Dollars. The Company's exposure to foreign currency risk arises primarily on fluctuations between the Canadian Dollars and the United States Dollars, UK Pounds Sterling, and Australian Dollars. The Company has not entered into any derivative instruments to manage foreign exchange fluctuations.

The following table shows a currency of net monetary assets and liabilities by functional currency of the underlying companies:

| | **Functional currency** | | | | | |
|---|---|---|---|---|---|---|
| Currency of net monetary asset/(liability) | Canadian dollar June 30, 2018 CAD$ | US dollar June 30, 2018 CAD$ | Pound Sterling June 30, 2018 CAD$ | Nigerian Naira June 30, 2018 CAD$ | West African Franc June 30, 2018 CAD$ | Total June 30, 2018 CAD$ |
| Canadian dollar | (169,465) | - | - | - | - | (169,465) |
| US dollar | (2,882,155) | - | - | 406 | - | (2,881,749) |

## ADDITIONAL INFORMATION

Additional disclosure of the Company's material change reports, news releases and other information can be obtained on SEDAR at www.sedar.com

### Disclosure of Outstanding Share Data

a) Authorized:

Unlimited common shares without par value

b) Common shares issued:

| | Number |
|---|---|
| Balance, June 30, 2018 | 326,229,630 |
| Balance, August 29, 2018 | 326,229,630 |

c) There are no warrants outstanding at June 30, 2018 and as at the date of this report.

d) The number of stock options that were outstanding and the remaining contractual lives of the options at June 30, 2018 were as follows:

| **Exercise Price** | **Number Outstanding** | **Weighted Average Remaining Contractual Life** | **Expiry Date** |
|---|---|---|---|
| $0.12 | 9,750,000 | 1.81 | January 16, 2020 |
| $0.12 | 500,000 | 2.10 | May 7, 2020 |
| $0.145 | 12,800,000 | 4.89 | March 12, 2023 |
| | 23,050,000 | 3.53 | |

The Company has granted employees, consultants, directors and officers share purchase options. These options were granted pursuant to the Company's stock option plan.

During the six months ended June 30, 2018, 12,800,000 options were issued, and during the year ended December 31, 2017 10,250,000 options were issued. No options expired during the six months ended June 30, 2018 or the twelve months ended December 31, 2017.

Under the 2018 Share Option Plan, 30,000,000 common shares of the Company are reserved for issuance upon exercise of options.

**EXPLORATION AND EVALUATION ASSETS EXPENDITURES**

Deferred exploration and acquisition expenditures for the six months ended June 30, 2018 are as follows:

| | Douta Gold Project, Senegal | Central Houndé Project, Burkina Faso | Segilola Gold Project, Osun Nigeria | Nigerian exploration licenses | Total |
|---|---|---|---|---|---|
| Assays and assessments | $ 129,353 | $ - | $ 29,998 | $ - | $ 159,351 |
| Geophysics, surveys and mapping | - | - | - | - | - |
| Camp expenses, equipment and rental | 86,018 | - | 22,355 | - | 108,373 |

## SUBSEQUENT EVENTS

On August 2, 2018_the Company announced a private placement pursuant to an agreement with Sprott Capital Partners, a division of Sprott Private Wealth LP, as lead agent, which, together with a syndicate of agents (collectively, the "Agents"), to market, on a commercially reasonable basis, up to 55,555,556 units (the "Units") of the Company at a price of $0.18, for aggregate gross proceeds of up to $10,000,000 million.

Each Unit will be comprised of one (1) common share of the Company and one (1) Common Share purchase warrant. Each Warrant shall be exercisable for one (1) Common Share at a price of $0.28 per share for a period of thirty-six (36) months. However, in the event that the Common Shares trade on the TSX Venture Exchange at a closing price equal to or greater than $0.36 for a period of twenty (20) consecutive trading days, the Company may give notice to the holders of the Warrants requiring that they exercise the Warrants with a period of thirty (30) days from the date of notice, failing which the Warrants shall expire.

On August 6, 2018 the Company announced the appointment of Adrian Coates as Non-Executive Chairman with immediate effect and the addition of Mr Collin Ellison as a Non-executive Director. Biographies for both Adrian and Collin are available on the Company's website.

On August 28, 2018 the Company announced the drilling of a potential discovery hole at a new prospect called Maka South located in the north east of the Douta Permit on its Douta Gold Project in south-east Senegal.

Drillhole DMRC012 on the Maka South Target intersected 4 metres true width at 11.4g/tAu from 18m downhole. In addition to this result, seven other RC holes intersected anomalous gold mineralisation including 1m at 3.59g/t Au in drillhole DMRC013.

These first pass drill results are considered to be significant as they are located adjacent to the nearby Makabingui Gold Project comprising total resources of 11.9 million tonnes at 2.6g/t Au for a contained 1 million oz Au in an area of the Douta Permit that has received very little exploration attention to date. Further detail is available at: **https://www.thorexpl.com/news/2018/3.2m-true-width-grading-11.4g-tau-intersected-at-maka-south-prospect-douta-gold-project-senegal/**

## INVESTOR RELATIONS

The Company engaged the services of Blytheweigh to assist with investor relations during the six months ended June 30, 2018. Blytheweigh provide Thor with public and investor relations services, including advising on aspects of Thor's TSX-V announcements and press releases, presentations and communications with analysts, journalists and investors.

## RISKS AND UNCERTAINTIES

The following discussion summarizes the principal risk factors that apply to the Company's business and that may have a material adverse effect on the Company's business, financial condition and results of operations, or the trading price of the Common Shares.

An investment in the securities of the Company is highly speculative and involves numerous and significant risks. The primary risk factors affecting the Company are set forth below and the risks discussed below should not be considered as all inclusive.

**Exploration, Development and Operating Risks**

Mineral exploration and development operations generally involve a high degree of risk. The Company's operations are subject to all the hazards and risks normally encountered in the exploration, development and production of gold, base metals and other minerals, including unusual and unexpected geologic formations, seismic activity, rock bursts, cave-ins, flooding and other conditions involved in the drilling and removal of material, any of which could result in damage to, or destruction of, mines and other producing facilities, damage to life or property, environmental damage and possible legal liability.

The Company's activities are directed towards the search for, evaluation of, and development of mineral deposits. There is no certainty that the expenditures to be made by the Company will result in discoveries of commercial quantities of minerals. There is aggressive competition within the mining industry for the discovery and acquisition of properties considered to have commercial potential. The Company will compete with other interests, many of which have greater financial resources than the Company has for the opportunity to participate in promising projects. Significant capital investment is required to achieve commercial production from successful exploration efforts.

Whether a mineral deposit will be commercially viable depends on a number of factors, some of which are: the particular attributes of the deposit, such as size, grade and proximity to infrastructure; metal prices which are highly cyclical; and government regulations, including regulations relating to prices, taxes, royalties, land tenure, land use, importing and exporting of minerals and environmental protection. The exact effect of these factors cannot be accurately predicted, but the combination of these factors may result in the Company not receiving an adequate return on invested capital.

**Land Title**

Title insurance generally is not available, and the Company's ability to ensure that it has obtained secure claim to individual mineral properties or mining concessions from time to time may be severely constrained. In addition, unless the Company conducts surveys of the claims in which it holds direct or indirect interests, the precise area and location of such claims may be in doubt. In addition, such mineral properties may be subject to prior unregistered liens, agreements, transfers or claims, and title may be affected by, among other things, undetected defects.

The Company has obtained title reports from Nigerian legal counsel with respect to the Segilola Gold Project, Senegal legal counsel with respect to the Douta Gold Project and from Burkina Faso counsel with respect to the Central Houndé Project, but this should not be construed as a guarantee of title. Other parties may dispute title to any of the Company's mineral properties and any of the Company's properties may be subject to prior unregistered agreements or transfers and title may be affected by undetected encumbrances of defects or governmental actions.

In addition, the Company may be unable to operate its properties as permitted or to enforce its rights with respects to its properties.

**Political Risks**

Future political actions cannot be predicted and may adversely affect the Company. Changes, if any, in mining or investment policies or shifts in political attitude in the countries in which the Company holds property interests in the future may adversely affect the Company's business, results of operations and financial condition. Future operations may be affected in varying degrees by government regulations with respect to, but not limited to, restrictions on production, price controls, export controls, currency remittance, income taxes, foreign investment, maintenance of claims, environmental legislation, land use, land claims of local people, water use and mine safety.

Failure to comply strictly with applicable laws, regulations and local practices relating to mineral right applications and tenure, could result in loss, reduction or expropriation of entitlements. The occurrence of these various factors and uncertainties cannot be accurately predicted and could have an adverse effect on the Company's consolidated business, results of operations and financial condition.

## Government Regulation

The mineral exploration and development activities which may be undertaken by the Company may be subject to various laws governing prospecting, development, production, taxes, labour standards and occupational health, mine safety, toxic substances, land use, water use, land claims of local people and other matters.

Exploration and development activities may also be affected in varying degrees by government regulations with respect to, but not limited to, restrictions on future exploration and production, price controls, export controls, currency availability, foreign exchange controls, income taxes, delays in obtaining or the inability to obtain necessary permits, opposition to mining from environmental and other non-governmental organizations, limitations on foreign ownership, expropriation of property, ownership of assets, environmental legislation, labour relations, limitations on repatriation of income and return of capital, limitations on mineral exports, high rates of inflation, increased financing costs, and site safety. This may affect both the Company's ability to undertake exploration and development activities in respect of its properties, as well as its ability to explore and operate those properties in which it current holds an interest or in respect of which it obtains exploration and/or development rights in the future.

No assurance can be given that new rules and regulations will not be enacted or that existing rules and regulations will not be applied in a manner which could limit or curtail development or future potential production. Amendments to current laws and regulations governing operations and activities of mining and milling or more stringent implementation thereof could have a substantial adverse impact on the Company.

## Permitting

The Company's operations may be subject to receiving and maintaining permits from appropriate governmental authorities. There is no assurance that delays will not occur in connection with obtaining all necessary renewals of such permits for future operations. Management of the Company believes it has received the necessary permits for the current operations. Prior to any development on any properties, the Company must receive permits from appropriate governmental authorities. There can be no assurance that the Company will obtain and/or continue to hold all permits necessary to develop or continue operating at any particular property. See also "Exploration, Development and Operating Risks" above.

## Environmental Risks and Hazards

All phases of the Company's operations are subject to environmental regulation in the jurisdictions in which it operates, and will be subject to environmental regulation in the jurisdictions in which it will operate in the future. These regulations mandate, among other things, the maintenance of air and water quality standards and land reclamation. They also set forth limitations on the generation, transportation, storage and disposal of solid and hazardous waste. Environmental legislation is evolving in a manner which will require stricter standards and enforcement, increased fines and penalties for non-compliance, more stringent environmental assessments of proposed projects and a heightened degree of responsibility for companies and their officers, directors and employees. There is no assurance that future changes in environmental regulation, if any, will not adversely affect the Company's operations. Environmental hazards may exist on the properties in which the Company holds interests from time to time which are unknown to the Company and which have been caused by previous or existing owners or operators of the properties. Government approvals and permits may in the future be required in connection with the Company's operations. To the extent such approvals are required and not obtained, the Company may be curtailed or prohibited from proceeding with planned exploration, production or development activities.

Failure to comply with applicable laws, regulations and permitting requirements may result in enforcement actions there under, including orders issued by regulatory or judicial authorities causing operations to cease or be curtailed, and may include corrective measures requiring capital expenditures, installation of additional equipment, or remedial actions. Parties engaged in the exploration or development of mineral properties may be required to compensate those suffering loss or damage by reason of the activities and may have civil or criminal fines or penalties imposed for violations of applicable laws or regulations.

Amendments to current laws, regulations and permits governing operations and activities of mining and exploration companies, or more stringent implementation thereof, could have a material adverse impact on the Company and cause increases in exploration expenses or capital expenditures or require abandonment or delays in development of new properties.

**Foreign Currency Exchange Rates**

Fluctuations in currency exchange rates, principally Nigerian Naira, West African CFA franc, British pound, US dollar and Australian dollar exchange rate and, to a lesser extent, other exchange rates, can impact the Company's earnings and cash flows. Certain of the Company's obligations and operating expenses may from time to time be denominated in Nigerian Naira, West African CFA franc, British pound, US dollar and Australian dollar. If the value of the Nigerian Naira, West African CFA franc, British pound, US dollar and Australian dollar increases relative to the Canadian dollar, the Company's results of operations, financial condition and liquidity could be materially adversely affected.

**Insurance and Uninsured Risks**

The Company's business is subject to a number of risks and hazards generally, including adverse environmental conditions, industrial accidents, labour disputes, unusual or unexpected geological conditions, ground or slope failures, cave-ins, changes in the regulatory environment and natural phenomena such as inclement weather conditions, floods and earthquakes. Such occurrences could result in damage to mineral properties or production facilities, personal injury or death, environmental damage to the Company's properties or the properties of others, delays, monetary losses and possible legal liability.

The Company currently only maintains nominal liability insurance. The Company may also be unable to maintain insurance to cover certain risks at economically feasible premiums. Insurance coverage may not continue to be available or may not be adequate to cover any resulting liability. Moreover, insurance against risks such as environmental pollution or other hazards as a result of exploration and production is not generally available to the Company or to other companies in the mineral exploration industry on acceptable terms. The Company might also become subject to liability for pollution or other hazards which may not be insured against or which the Company may elect not to insure against because of premium costs or other reasons. Losses from these events may cause the Company to incur significant costs that could have a material adverse effect upon its financial performance and results of operations.

**Infrastructure**

Mining, processing, development and exploration activities depend, to one degree or another, on adequate infrastructure. Reliable roads, bridges, power sources and water supply are important determinants, which affect capital and operating costs. Unusual or infrequent weather phenomena, sabotage, government or other interference in the maintenance or provision of such infrastructure could adversely affect the Company's operations, financial condition and results of operations.

Management of the Company believes that the infrastructure in Nigeria, Senegal and Burkina Faso is comparable to those in any remote mining location located in other parts of the world.

**Competition May Hinder Corporate Growth**

The mining industry is competitive in all of its phases. The Company faces strong competition from other mining companies in connection with the acquisition of properties producing, or capable of producing, precious and base metals. Many of these companies have greater financial resources, operational experience and technical capabilities than the Company. As a result of this competition, the Company may be unable to acquire or maintain attractive mineral exploration properties on terms it considers acceptable or at all. Consequently, the Company's operations and financial condition could be materially adversely affected.

**Additional Capital**

The development of the Company's properties will require substantial additional financing. Failure to obtain sufficient financing may result in delaying or indefinite postponement of exploration, development or production on any or all of the Company's properties from time to time, or even a loss of property interest. There can be no assurance that additional capital or other types of financing will be available if needed or that, if available, the terms of such financing will be favourable to the Company.

**Commodity Prices**

The price of the Common Shares, the Company's financial results and exploration and development activities may in the future be significantly adversely affected by declines in the price of gold, base metals and other minerals. Precious metal prices fluctuate widely and are affected by numerous factors beyond the Company's control such as the sale or purchase of gold and other precious and base metal by various central banks and financial institutions, interest rates, exchange rates, inflation or deflation, fluctuation in the value of the United States dollar and foreign currencies, global and regional supply and demand, and the political and economic conditions of major precious metal-producing countries throughout the world. The prices of precious metals are subject to fluctuation, and future serious price declines could cause development of any properties in which the Company may hold an interest from time to time to be impracticable. Future production from the Company's properties, if any, will be dependent upon, among other things, precious metal and other base metals prices that are adequate to make these properties economic.

In addition to adversely affecting the Company's financial condition and exploration and development activities, declining commodity prices can impact operations by requiring a reassessment of the feasibility of a particular project. Such a reassessment may be the result of a management decision or may be required under financing arrangements related to a particular project. Even if the project is ultimately determined to be economically viable, the need to conduct such a reassessment may cause substantial delays or may interrupt operations until the reassessment can be completed.

**Dependence on Key Personnel**

The Company has a small management team and the loss of a key individual or the inability to attract suitably qualified personnel in the future could materially and adversely affect the Company's business.

**Limited Operating History**

The Company has no history of generating revenue or profits. There can be no assurance that it will generate profits in the future.

**Historical Data**

The Company has compiled technical data in respect of Segilola and Douta Gold projects, much of which was not prepared by the Company. While the data represents a useful resource for the Company, much of it must be verified by the Company before being relied upon in formulating exploration programs.

**Market Price of Common Shares**

Securities of publicly-listed mineral resource companies can be subject to substantial volatility, often based on factors unrelated to the financial performance or prospects of the companies involved. These factors include macroeconomic developments in North America, China and globally and market perceptions of the attractiveness of particular industries. The Company's share price is also likely to be significantly affected by short term changes in precious and base metal prices or in its financial condition or results of operations as reflected in its quarterly earnings reports. Other factors unrelated to the Company's performance that may have an effect on the price of the Common Shares include the following: the extent of analytical coverage available to investors concerning the Company's business may be limited if investment banks with research capabilities do not continue to follow the Company; lessening in trading volume and general market interest in the Company's securities may affect an investor's ability to trade significant numbers of Common Shares; the size of the Company's public float may limit the ability of some institutions to invest in the Company's securities; and a substantial decline in the price of the Common Shares that persists for a significant period of time could cause the Company's securities to be delisted from the exchange on which they trade, further reducing market liquidity.

As a result of any of these factors, the market price of the Common Shares at any given point in time may not accurately reflect the Company's long-term value. Securities class action litigation often has been brought against companies following periods of volatility in the market price of their securities. The Company may in the future be the target of similar litigation. Securities litigation could result in substantial costs and damages and divert management's attention and resources.

**Future Sales of Common Shares by Existing Shareholders**

Sales of a large number of Common Shares in the public market, or the potential for such sales, could decrease the trading price of the Common Shares and could impact the Company's ability to raise capital through future sales of Common Shares.

**Conflict of Interest**

Certain of the directors and officers of the Company also serve as directors and/or officers of other Companies involved in mining and/or natural resource exploration and development and consequently there exists the possibility for such directors and officers to be in a position of conflict. Any decision made by any of such directors and officers involving the Company will be made in accordance with their duties and obligations to deal fairly and in good faith with a view to the best interest of the Company and its shareholders. In addition, each of the directors is required to declare and refrain from voting on any matter in which such directors may have a conflict of interest in accordance with the procedures set forth under applicable laws.

## Additional information

Additional information relating to the Company is available on SEDAR at www.sedar.com.

***Caution Regarding Forward-Looking Information:***

*Certain information contained in this MD&A constitutes forward-looking information, which is information relating to future events or the Company's future performance and which is inherently uncertain. All information other than statements of historical fact may be forward-looking information. Forward-looking information is often, but not always, identified by the use of words such as "seek", "anticipate", "budget", "plan", "continue", "estimate", "expect", "forecast", "may", "will", "project", "predict", "potential", "targeting", "intend", "could", "might", "should", "believe" and similar words or phrases (including negative variations) suggesting future outcomes or statements regarding an outlook. Forward-looking information contained in this MD&A includes, but is not limited to, the Company's expectations regarding its future work capital requirements, including its ability to satisfy such requirements, the exposure of its financial instruments to various risks and its ability to manage those risks.*

*Forward-looking information involves known and unknown risks, uncertainties and other factors that may cause actual results or events to differ materially from those anticipated in such forward-looking information. The Company believes the expectations reflected in the forward-looking information are reasonable but no assurance can be given that these expectations will prove to be correct and readers are cautioned not to place undue reliance on forward-looking information contained in this MD&A.*

*The forward-looking information contained in this MD&A are made as of the date hereof and the Company undertakes no obligation to update publicly or revise any forward-looking information, whether as a result of new information, future events or otherwise, except as otherwise required by law. All of the forward-looking information contained in this MD&A is expressly qualified by this cautionary statement.*
